

Rainwater Harvesting Filters

And for larger rain harvesting jobs...

Commercial Rain Head Filters help improve your tank water quality with a single screen that's vermin and vector proof (0.955mm stainless steel aperture). These rain heads handle a flow rate of 17 litres per second and require no maintenance thanks to their self-cleaning Cleanshield technology. Filters are custom made to order and are available in stainless steel, ZINCALUME® or in any of the 20 standard COLORBOND® colours.

Part #	Downspout (in)	Description
RHCL01	6	6 inch commercial rain head filter
