3

Choose your pump package.

BARR carries a wide variety of submersible & surface mounted pumping packages, complete with controls and accessories. The AY Macdonald Duramax Duplex pump is our recommendation for a large-scale commercial rainwater harvesting system.

4

Install your system and start collecting.

BARR will make sure you have all the components you need for your unique, customized commercial rainwater harvesting system. Save money by saving water. Call our experts today.

Explore Water Treatment Options

BARR also works with a number of leading water system companies to provide a wide variety of water treatment components. Call us today to learn more.
