

DIY Rain Barrel Diverter Kit

Take control of your rain supply with the Do-it-Yourself Rain Barrel Diverter Kit. The all-in-one package deal takes the guesswork out of making and using a rain barrel. Once set up, your rain barrel can be used as a convenient source of rainwater, filled from any downspout at your home, garage, barn, shed or building.

Features

- All parts are included to make a rain barrel using a suitable watertight container that you supply
- FlexiFit™ diverter and all fittings included for installation
- The FlexiFit™ diverter sends rainwater to the barrel and when full, returns it to the downspout
- Illustrated step-by-step user guide is included
- Works with heavy-duty trash barrels, recycled plastic drums, wood barrels and other watertight containers
- Works with standard 2" x 3" and 3" x 4" rectangular downspouts

The FlexiFit™ diverter advantage makes installation as easy as 1-2-3

Drill hole in downspout

Insert FlexiFit™ diverter

Attach hose

Hole cover included
