Rainwater Harvesting Filters

The Quattro Twist

The Quattro Twist from GRAF provides a 90% water yield for up to 2.7" x 4.7" rectangular downpipes or up to 3" round piping. One quick adjustment bypasses the filtration and collection for protection of the hardware in the winter months. This system is suitable for roof areas up to 860 square feet and is available in either beige or brown to complement the colour of your home.

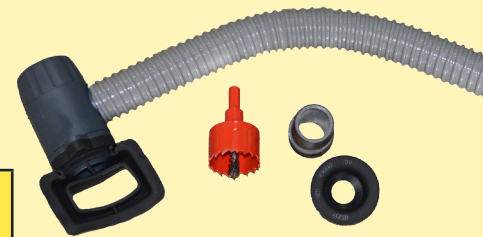

Part #	Downspout Size (in)	Description
503052	2.7 x 4.7	Beige Quattro Twist Downspout Filter
503051	2.7 x 4.7	Brown Quattro Twist Downspout Filter

The Rapido Quattro

With an installation time of only 5 minutes this quick solution to rainwater collection is suitable for up to 860 square feet! The Rapido Quattro is compatible with square down spouts measuring 2" x 3" and the included connection seal and core drill ensures you have the equipment you need to make its installation quick and easy. The overflow is perfect for the rainy seasons where you have more rain than you can collect. An all-season solution to residential rainwater collection.
