

The Paper IBC

If you're looking for a completely dependable, economical and environmentally responsible solution to your liquid storage and handling needs, the Paper IBC is a great choice.

This IBC is a "one-way" package, so there are no fossil fuels consumed to return the package after dispense and there is no landfill space consumed either as the container is biodegradable, recyclable and waste-to-energy efficient.

The PaperIBC container has passed the stringent ISTA (International Safe Transit Association) vibration and shock tests and has met the NMFTA (National Motor Freight Traffic Association) requirements for intermediate bulk containers for liquids. The heavy duty nine ply PaperIBC container is capable of with-standing up to 10,000 lbs of compression force. Plus, these IBC's come unassembled, significantly reducing your freight costs and using 80% less storage space when not in use.

USG	IG	LTR	Part #	Length (in)	Width (in)	Height (in)	Wall Thickness	Weight (lbs)
210	176	800	800L	40.5	40.5	36.25	9 ply corrugated. 1 3/4" thick	63
265	220	1000	1000L	43	43	40	9 ply corrugated. 1 3/4" thick	66
275	229	1041	275G	43	43	41	9 ply corrugated. 1 3/4" thick	66
275	229	1041	275G-GMA	39	47	42	9 ply corrugated. 1 3/4" thick	66

Each IBC comes with a corresponding liner.. Made from 3 plies of 3.2mil type 43 coextruded low density polyethylene, the liners are attached to a fitted corrugated cassette and should be installed during assembly of the Paper IBC.
