

Pallets

Constructed of durable polyethylene, Saeplast pallets represent a secure investment for both transportation and storage requirements. Flexible in design, hard-wearing and easy to clean, they are an ideal replacement for wooden pallets, with all their inherent disadvantages. Easily handled by pallet jack or forklift. Saeplast pallets come in flat-top or raised-lip versions and include features such as easy stackability and a non-skid rough surface (flat-top only) for added safety.

DP40F (Flat Top)

DP40R (with edges)

Part #	Description	Lbs	Kg	Dimensions (inches)		
				L	W	H
DP40F	Pallet-Flat Top	48.4	22	48	40	6.6
