Dock Floatation

Standard Foam-Filled Dock Floats

It's time to build an unsinkable dock with BARR's vast line of EPS foam-filled dock floats.

With a nominal 0.150 inch thick walls using virgin polyethylene with ultraviolet inhibitors to make the floats extra durable to withstand damage from harsh marine environments. The floats are suitable for both residential and commercial applications, and are backed by a 15-year limited manufacturer warranty.

With a one piece roto-molded polyethylene shell, they're relatively lightweight and are highly cost effective compared to concrete systems. Extra wide ribbing on the exterior of the floats proves easier tool access during install and tank tested buoyancy ratings are +0/-5%.
