# Double-Wall Insulated Bins

## Small Boxes

### D505

The D505 bin has been designed to accommodate the needs of the North Atlantic Lobster Industry. This bin accommodates two standard-sized lobster crates safely; the bin also holds room for additional ice to be added as needed. While this container has been designed to suit lobster crates, it is also well-suited to hold and ship a variety of fish and meat products. Use as an icebox, fish box, meat container, poultry and recycle container, and more.

The D505 is double-walled with a PUR core and high insulation factor, along with multiple lid options, marking and tracking options, and multiple colours available. Contact us today to learn more about these brand new bins from Saeplast.

						Inside/Outside (inches)		
Part #	Description	USG	LTR	Lbs	Kg	Length	Width	Height
D505	D Series Bin	133	505	22	10	33.7/37.4	25.8/29.5	33.9/39.3
